Product Description

Super Wide Screen 49 Inch Gaming Monitor 5120*1440 144hz Curved Gaming Pc Monitor

A 49-inch gaming monitor with a 144Hz refresh rate is a high-performance display designed to provide an incredibly immersive and smooth gaming experience.

Resolution

A 49-inch gaming monitor typically boasts a high resolution, such as 5120x1440 pixels (Dual QHD). These resolutions provide sharp and detailed visuals, allowing you to see more of the game world and enjoy stunning graphics.

Refresh Rate

The standout feature of a 49-inch 144Hz gaming monitor is its high refresh rate. With a 144Hz refresh rate, the monitor can refresh the screen 144 times per second, resulting in incredibly smooth and fluid motion. This fast refresh rate minimizes motion blur and provides a responsive gaming experience, especially in fast-paced games where quick reactions are crucial.

HDR Support

Certain 49-inch 144Hz gaming monitors come with High Dynamic Range (HDR) support. HDR technology enhances the contrast and color accuracy of the display, resulting in more realistic and vibrant visuals. It allows you to experience games with a broader range of colors and improved depth perception.

Connectivity Options

These gaming monitors typically offer various connectivity options, including DisplayPort, HDMI, and USB ports. This allows you to connect your gaming PC, gaming consoles, and other devices to the monitor with ease.

Gaming Presets and Customization

Some gaming monitors provide preconfigured gaming presets optimized for specific game genres. These presets can adjust settings like brightness, contrast, and color saturation to enhance the gaming experience. Additionally, our monitors offer customizable settings, allowing you to fine-tune the display according to your preferences.

Ergonomic Design

Certain 49-inch 144Hz gaming monitors come with adjustable stands that allow you to tilt, swivel, and adjust the height of the monitor. This ensures optimal viewing angles and helps reduce strain during long gaming sessions.

Additional Features

Depending on the specific model, you may find additional features such as built-in speakers, audio output options, customizable RGB lighting, and on-screen display overlays for in-game information or settings adjustments.

49 inch Gaming Monitor		
Brand	OEM/ODM	
Product color	Black
