Product Description

Custom Logo 32 Inch Led Monitor 1080p Full Hd Display Ips Panel Business Computer Monitor 75hz 100Hz

Display Size and Resolution

The monitor features a large 32-inch screen size, providing an immersive viewing experience. The Full HD resolution of 1920x1080 pixels ensures clear and detailed visuals.

Variable Refresh Rate

The 32-inch Full High-Definition monitor offers a variable refresh rate, ranging from 75Hz to 100Hz. This feature allows the monitor to adjust its refresh rate dynamically based on the content being displayed. A higher refresh rate results in smoother motion and reduced motion blur, enhancing the gaming experience.

Response Time

The response time refers to how quickly a pixel can change from one color to another. Gaming monitors typically have low response times to minimize motion blur and ghosting effects. Monitors in this range generally have response times of 1 ms to 3 ms.

Connectivity Options

The 32-inch gaming monitor typically offers various connectivity options, including HDMI, DisplayPort, and possibly VGA or USB ports. These connections allow you to connect the monitor to your gaming PC, gaming console, or other compatible devices.
