Product Description

OEM 18.5 19 Inch LCD Monitor IPS Panel Office Desktop Computer Monitor

IPS Panel Technology

The 18.5-inch LCD monitor features an IPS (In-Plane Switching) panel, providing superior color accuracy, wide viewing angles, and excellent image quality. This ensures consistent and vibrant colors, making it suitable for tasks that require accurate color representation, such as graphic design or photo editing.

Clear Display

The 19-inch LCD monitor offers a resolution of 1280x1024 pixels, delivering clear and detailed visuals. While it does not provide full HD resolution, it offers a decent level of image quality for tasks like document editing, web browsing, or multimedia playback.

Standard Refresh Rate

The 18.5-inch computer monitor has a refresh rate of 60Hz, which is the standard for most monitors. While it may not offer the same smoothness as higher refresh rates, it is suitable for general office use and tasks that do not involve fast motion.

Compact Size

The monitor typically comes in an 18.5 to 19-inch size, making it compact and space-saving. It is ideal for users who require a smaller display or have limited desk space. Its small form factor allows for easy placement in various work environments.
