Product Description

Super Wide Screen 49 Inch LCD 5K Monitor Gaming Curved Monitor

Display Size

With a massive 49-inch screen, this monitor provides an immersive gaming experience. The large size ensures that you can see more details in your games, giving you an advantage over your opponents.

5K Resolution

The 49 inch gaming monitor boasts a 5K resolution, which means it has a pixel density of approximately 5120 x1440 pixels. This high resolution delivers incredibly sharp and detailed visuals, allowing you to see fine details in your games.

Curved Design

The 49 inch gaming monitor features a curved display that wraps around your field of view, providing a more immersive gaming experience. The curvature of the screen helps to reduce eye strain and makes you feel more engaged with the content on the monitor.

75Hz Refresh Rate

The refresh rate of 75Hz ensures smooth and fluid motion on the screen. This higher refresh rate is particularly beneficial for fast-paced games, as it reduces motion blur and provides a more responsive gaming experience.

Picture-in-Picture (PiP) and Picture-by-Picture (PbP)

Certain models may offer PiP and PbP functionalities, allowing you to display multiple video sources simultaneously on the screen. This feature can be useful for multitasking or monitoring different devices while gaming.
