Product Description

Desktop Computer Monitors 19 Inch Tft Lcd Pc Monitor 4:3 Square Screen Display For CCTV

Screen Size

The monitor has a diagonal screen size of 19 inches, measured from corner to corner. The larger screen size offers a more spacious viewing area, allowing more content to be displayed on the screen.

Display Technology

Like other LCD monitors, the 19-inch monitor utilizes liquid crystal display technology. It consists of a layer of liquid crystals sandwiched between two polarized glass panels, which manipulate light to create images.

Response Time

The response time measures how quickly pixels on the display can change from one color to another. A lower response time is generally preferred for minimizing motion blur and ghosting in fast-moving scenes. A 19-inch LCD monitor may have a response time of around 5 milliseconds (ms) to 8 ms, depending on the model.

Connectivity

The 19-inch LCD monitor usually provides a range of connectivity options to connect to various devices. Common options include VGA (analog), and HDMI (digital). The available connectivity ports may vary depending on the specific model.

Adjustability

Many 19-inch LCD monitors come with adjustable stands or mounting options to provide ergonomic flexibility. These adjustments can include tilt, swivel, height adjustments, and even the ability to rotate the screen into a portrait orientation.
